

Investing in plant health: **better lives for all**

Putting financial and technical resources to protect the world's plants and natural resources makes sense.

- » **It moves us closer to a zero-hunger world.** Healthy plants and agricultural crops provide food, nutrition and livelihoods especially to food-insecure populations. When we protect global food security, we help alleviate poverty (and its trickle-down effects) around the world.
- » **It protects precious biodiversity.** Protecting ecosystems from plant pests, keeping the diversity in flora and fauna, and maintaining ecological balance provides plants and crops a healthy environment to thrive in.
- » **It promotes safe international trade.** Curbing the movement of plant pests and diseases across international borders not only ensures smooth import and export transactions but also protects economies and livelihoods from trade disruptions.

Contributing to the UN 2030 Sustainable Development Goals

The International Plant Protection Convention (IPPC), a multilateral treaty for the protection of plants and natural resources ratified by 185 countries, is focusing on eight development agenda items (DAIs) or key areas of work on plant protection to support food security, environmental protection and safe trade in the current decade. The DAIs are anchored on the IPPC Strategic Framework 2020-2030 which sets out the overall structure and priority areas of IPPC's work.

1. Harmonizing electronic data exchange

– connecting countries to the IPPC ePhyto Solution to replace paper phytosanitary certificates with digital ePhyto certificates. This makes trade safer, faster, more cost-effective and eliminates the risk of fraud, delay, damage or loss associated with paper certificates. By 2030, 193 FAO member countries are exchanging ePhytos.

Status: Ongoing
Total budget: USD 9.6 million

2. Supporting market access through commodity

– specific plant health standards, commodity-specific International Standard for Phytosanitary Measures (ISPMs) to facilitate market access, simplify and accelerate trade negotiations, create market opportunities and simplify safe trade in plants and plant products.

Status: Ongoing
Total budget: USD 2.2 million

3. Managing e-commerce and postal and courier pathways

– an improved system to protect plants and plant products traded through small parcels.

Status: Ongoing
Total budget: USD 234 000

4. Developing guidance on the use of third-party entities

– provide options for NPPOs to use third-party entities to conduct phytosanitary actions such as inspection, testing, surveillance, pest diagnosis, treatment and auditing.

Status: Ongoing
Total budget: USD 605 000

5. Strengthening pest outbreak alert and response systems (POARS)

– a more robust system for countries to communicate emerging pest risks. POARS is envisioned to provide countries with regular information on new pest interceptions and alert them on pest outbreaks and changes in status of the most important pests.

Status: To commence in 2024
Total budget: USD 3.24 million

6. Assessing and managing climate change impacts on plant health

– scientific analysis is captured in a published technical resource; phytosanitary issues are elevated in the international debate on climate change.

Status: Ongoing
Total budget: USD 322 000
Phase 2 (2026–2028) contingent to CPM review.
If approved the provisional annual budget is USD 161,000.

7. Establishing global phytosanitary research coordination – a system to avoid overlap in research activities, advance plant health more quickly and use research resources more efficiently.

Status: To commence in 2024

Total budget: USD 142 000

8. Establishing diagnostic laboratory networking – a lab network that provides reliable and timely diagnoses. It is expected that NPPOs will have almost instant access to reliable plant pest laboratories or plant health clinics, with a broad range of analytical capacities. This will allow NPPOs to establish technically justified phytosanitary measures, facilitate safe trade, and respond to pest outbreaks more quickly.

Status: To commence in 2024

Total budget: USD 1 478 000

Agenda Item	2023	2024	2025	2026	2027	2028	2029	2030
1. Harmonization of electronic data exchange	Delivery		Review	Ongoing core activity				
2. Commodity-specific ISPMs	Delivery					Review	Ongoing core activity	
3. Management of e-commerce and postal and courier pathways	Delivery	Complete & Review	Scope & Plan	CPM Go or Stop decision				
4. Developing guidance on the use of third-party entities	Delivery		Scope & Plan	CPM Go or Stop decision	Delivery			Review
5. Strengthening pest outbreak alert and response systems	Scope & Plan	CPM Go or Stop decision	Delivery				Review	Ongoing core activity
6. Assessment & management of climate change on plant health Delivery	Delivery		Complete & Review	Scope & Plan	CPM Go or Stop decision			
7. Global phytosanitary research coordination	Not Started		Scope & Plan	CPM Go or Stop decision				
8. Diagnostic laboratory networking	Not Started	Scope & Plan	CPM Go or Stop decision	Delivery				

Table 1. Phased implementation plan

Budget Summary	2023 (\$'000)	2024 (\$'000)	2025 (\$'000)	2026 (\$'000)	2027 (\$'000)	2028 (\$'000)	2029 (\$'000)	2030 (\$'000)	Total
1. Harmonisation of electronic data	971	1,147	1,163	1,263	1,263	1,263	1,263	1,263	9,596
2. Commodity and pathway specific ISPMs	254	254	324	254	324	309	239	239	2,197
3. Management of e-commerce and courier pathways	112	122	-	-	-	-	-	-	234
4. Developing guidance on the use of third party entities	-	-	50	81	91	121	111	151	605
5. Strengthening pest outbreak alert and response systems	265	425	425	425	425	425	425	425	3,240
6. Assessment and Management of climate change on plant health	161	161	161	-	-	-	-	-	483
7. Global phytosanitary research coordination	-	-	47	95	-	-	-	-	142
8. Diagnostic laboratory networking	54	54	125	165	285	245	265	285	1,478
Total	1,817	2,163	2,295	2,283	2,388	2,363	2,303	2,363	17,975
Total excl. Electronic Exchange	846	1,016	1,132	1,020	1,125	1,100	1,040	1,100	8,379
