Simulation exercises: a tangible tool in managing spread of Fusarium TR4

Prevention through on-the-ground capacity building exercises to develop and strengthen contingency plans for Fusarium TR4 detection.

Preparedness by empowering the national phytosanitary community with the necessary skill set, know-how, and tools to react to a Fusarium TR4 threat in a timely-manner.

A **contingency response plan** in place, with clear next steps and actions across national phytosanitary stakeholders.

United against Fusarium TR4
